

Coastal landscapes - Key ideas	100% confident	I am okay with this, some work needed	Definitely need more revision
The UK has a range of diverse landscapes.			
I can give an overview of the location of major upland/lowland areas and river systems in the UK.			
The coast is shaped by a number of physical processes.			
I know the different wave types and their characteristics.			
I know the processes of coastal weathering, e.g. mechanical and chemical weathering.			
I know the processes of coastal mass movement, e.g. sliding, slumping and rock falls.			
I know the processes of coastal erosion, e.g. hydraulic power, abrasion and attrition.			
I know the processes of coastal transportation, e.g. longshore drift.			
I know the processes of coastal deposition and why sediment is deposited in coastal areas.			
Distinctive coastal landforms are the result of rock type, structure and physical processes.			
I understand how geological structure and rock type influence coastal forms.			
I know the characteristics and formation of landforms resulting from erosion, e.g. headlands and bays, cliffs and wave cut platforms, caves, arches and stacks.			
I know the characteristics and formation of landforms resulting from deposition, e.g. beaches, sand dunes, spits and bars.			
I know a case study / example of a section of coastline in the UK to identify its major landforms of erosion and deposition.			

Different management strategies can be used to protect coastlines from the effects of physical processes.			
I know the costs and benefits of hard engineering, e.g. sea walls, rock armour, gabions and groynes.			
I know the costs and benefits of soft engineering, e.g. beach nourishment and reprofiling, dune regeneration.			
I know the costs and benefits of managed retreat, e.g. coastal realignment.			
I know a case study / example of an example of a coastal management scheme in the UK to show the reasons for management.			
I know a case study / example of an example of a coastal management scheme in the UK to show the management strategy.			
I know a case study / example of an example of a coastal management scheme in the UK to show the resulting effects and conflicts.
