

Natural and tectonic hazards - Key ideas	100% confident	I am okay with this, some work needed	Definitely need more revision
Natural hazards pose major risks to people and property			
I know the definition of a natural hazard.			
I know the types of natural hazard.			
I know the factors affecting hazard risk.			
Earthquakes and volcanic eruptions are the result of physical processes			
I know plate tectonic theory and theory			
I know the global distribution of earthquakes and volcanic eruptions and their relationship to plate margins.			
I know the physical processes taking place at different types of plate margin (constructive, destructive and conservative) that lead to earthquakes and volcanic activity.			
The effects of, and responses to, a tectonic hazard vary between areas of contrasting levels of wealth			
I know the primary and secondary effects of a tectonic hazard and know the immediate and long term responses to a tectonic hazard.			
I know named examples to show how the effects and responses to a tectonic hazard vary between two areas of contrasting levels of wealth.			
Management can reduce the effects of a tectonic hazard			
I know the reasons why people continue to live in areas at risk from a tectonic hazard.			
I know how monitoring, prediction, protection and planning can reduce the risks from a tectonic hazard.
