

Weather - Key ideas	100% confident	I am okay with this, some work needed	Definitely need more revision
Global atmospheric circulation helps to determine patterns of weather and climate.			
I know about general atmospheric circulation model: pressure belts and surface winds.			
Tropical storms (hurricanes, cyclones, typhoons) develop as a result of particular physical conditions.			
I know the global distribution of tropical storms (hurricanes, cyclones, typhoons).			
I have an understanding of the relationship between tropical storms and general atmospheric circulation.			
I know the causes of tropical storms.			
I know the sequence of the formation and development of a tropical storm.			
I know the structure and features of a tropical storm.			
I know how climate change might affect the distribution, frequency and intensity of tropical storms.			

Tropical storms have significant effects on people and the environment.			
I know the primary and secondary effects of tropical storms.			
I know the immediate and long-term responses to tropical storms.			
I can use a named example of a tropical storm to show its effects and responses.			
I know how monitoring, prediction, protection and planning can reduce the effects of tropical storms.			
The UK is affected by a number of weather hazards.			
I understand the types of weather hazard experienced in the UK.
